

## **The Property Programme (2004)**

Nina Kati's talk about Feng Shui on the Property Programme stimulated so much interest and was so popular with radio listeners that she was invited to come back week after week.

During this period (6 consecutive weeks) she covered the general principles of Feng Shui, answered listeners' queries about their homes and their personalities, and gave tips and advice.

The number of listeners to the Property Programme grew rapidly, prompting the most telephone calls and emails the station has ever received on any programme.

Producers said it was the most popular subject they have ever covered and as a result WLR FM used her voice to advertise their weekly program to listeners.
